India

Professional Summary

Principal Mobile Engineer / iOS Architect with 10+ years of experience building secure, high-scale mobile products and design systems for enterprise banking and consumer apps. Currently, the company is focused on applying AI to rapidly prototype and validate MVPs such as fraud call detection for mobile banking users, mobile security frameworks for device integrity and anomaly detection, and API gateway onboarding dashboards with LLM-powered assistants for developers. Have shipped and iterated on AI-augmented features end-to-end — from problem framing, data/telemetry instrumentation, and experimentation to production-quality UX — blending deep frontend engineering with analytical thinking, research-style curiosity, and CI/CD automation while mentoring cross-functional teams.

Technical Skills

UI/UX & Frontend: Swift, SwiftUI, UIKit, React JS, React Native, JavaScript, TypeScript, Design Systems, Component Libraries

Backend & APIs: Java, Spring Boot (banking microservices, API integrations), Python (scripting, automation, REST Api's)

iOS Development: Swift, Objective-C, Combine, Swift Concurrency, Cocoa Touch, Core Data, MVVM, VIPER, MVC

AI & Data: LLM-assisted development (Perplexity, GitHub Copilot), experimentation, telemetry dashboards, anomaly/fraud pattern analysis, prompt design for developer tools

CI/CD & DevOps: Jenkins, GitHub Actions, Bitrise, Travis CI, Fastlane, TestFlight, Xcode Cloud

Testing: XCTest, XCUITest, Earl Grey, Unit Testing, UI Automation, Code Coverage Reports

Tools & Frameworks: Xcode, Cocoa Pods, Carthage, xcframeworks, Alamofire, RxSwift, Git, Jira

SDLC: Change Request (CR) Process, Impact Assessment, Agile/Scrum, SOLID Principles

Leadership: Squad leadership, mentoring, cross-team alignment, sprint planning, release management

Professional Experience

DBS Bank

June 2023 – Present

Senior Software Engineer – UI/UX Lead (Mobile & React)

Singapore

- Lead UI/UX development for DBS mobile app using React and native iOS, delivering pixel-perfect, high-availability interfaces for millions of users across 15+ banking features.
- Architected a React integration framework and reusable component library adopted across 5+ domains bank-wide, establishing consistent design patterns and reducing development time by 40%.
- Designed an AI-assisted onboarding dashboard for internal API consumers, auto-generating docs, request samples, and integration checklists from OpenAPI specs to reduce time-to-first-successful-call.
- Collaborated with backend teams on Java/Spring Boot banking microservices, refining REST contracts, debugging integration issues, and contributing small enhancements to support new mobile and React UI flows.
- Developed internal Python scripts to automate log analysis, release readiness checks, and telemetry-based alerts, reducing manual effort for ops and development teams.
- Managed complete SDLC including Change Request (CR) process with impact assessment, testing strategy, UAT coordination, and stakeholder communication across multiple squads.
- Established CI/CD pipelines using Jenkins, AWS Evolve, GitHub Actions, and Fastlane, automating builds, tests, code coverage reports, and zero-downtime deployments.
- Led Xcode 14, 15, 16, and 26 migration initiatives, resolving unit test compatibility issues and ensuring code stability across Swift, Objective C and React modules.
- Built a comprehensive design system with reusable UI components in SwiftUI and React ensuring accessibility compliance and consistent user experience.
- Optimized UI performance, reducing app launch time by 50% and memory consumption by 30% through profiling, refactoring, and targeted component-level optimizations.
- Mentored a team of 5 developers on React best practices, SwiftUI animations, and UI/UX principles, improving team velocity by 35%.
- Implemented security measures including SSL pinning, biometric authentication flows (TouchID/FaceID), and secure session management for banking compliance, laying groundwork for AI-driven anomaly detection on session data.

foodpanda

March 2020 – May 2023

Senior Software Engineer – iOS Development

Singapore

- Led iOS UI/UX development for an application serving 5M+ users across APAC with focus on marketing campaigns, offers, and order tracking interfaces.

- Designed modular MVVM architecture using Combine framework, creating reusable UI components enabling parallel development across an 8-member team.
- Developed real-time order tracking UI using WebSockets and MapKit, improving delivery accuracy and customer satisfaction by 45%.
- Prototyped an AI-assisted fraud/abuse monitoring view on top of tracking and promo usage data to help ops teams quickly identify suspicious patterns in orders and rider behavior.
- Managed CI/CD pipelines on Bitrise and Travis CI, ensuring smooth deployments and monitoring build health.
- Built a UI component library using Carthage and xcframeworks [Mix of Swift and Objective C] for seamless integration across multiple domains.
- Achieved 85% code coverage using XCTest and automation frameworks, reducing production bugs by 60%.

DBS Bank (via Altimetrik)

August 2018 – January 2020

Senior Software Engineer – iOS Development

Hyderabad, India

- Led digital transformation from Kony hybrid framework to native iOS, migrated the code base to Objective C and Swift, developing UI modules for fund transfers, bill payments, and account management used by 3M+ customers, .
- Implemented biometric authentication UI flows and secure session management using Keychain and TouchID/FaceID, forming the basis for later mobile security enhancements.
- Collaborated with security teams to design a reusable mobile security framework prototype (jailbreak detection, device integrity checks, API misuse safeguards) for banking apps.
- Used AI tools to speed up threat modeling, code review, and test-case generation for security scenarios, improving coverage and reducing manual effort.
- Managed Jenkins CI/CD pipelines for automated builds, monitoring pipeline health and ensuring quality gates.
- Created a reusable UI component library ensuring a consistent banking experience across millions of customer touchpoints.

AgreeYa Mobility (Quest Global)

December 2017 – July 2018

Senior Software Engineer

Pune, India

- Developed an iOS framework for Apple CarPlay integration with custom UI for vehicle head unit communication.
- Built product from scratch with Bluetooth connectivity and Siri integration, and converted C++ libraries to Swift, Objective C compatible frameworks.
- Explored basic anomaly detection on vehicle/connection logs to improve stability and inform future AI-powered diagnostics.

Webdunia India Pvt Ltd

July 2015 – December 2017

iPhone Developer

Indore, India

- Built news and media iOS applications with focus on content streaming, offline reading, and push notifications, Re-writing older Objective C Application to Swift.
- Implemented multimedia playback UI using AVFoundation and optimized image loading, reducing bandwidth by 35%.
- Managed full SDLC including client communication, requirement gathering, and App Store publishing.

AI & Research-Oriented Projects

- **Fraud Call Detection MVP:** Designed a proof-of-concept fraud call detection flow for a mobile banking context by combining call metadata, behavioral signals, and AI-assisted heuristics, with dashboards to inspect flagged interactions and tune thresholds.
- **Mobile Security Framework for Banking Apps:** Architected a reusable mobile security framework (device integrity, jailbreak/root checks, secure networking patterns) and used AI tools to generate threat models, test cases, and refactoring suggestions.
- **API Gateway Onboarding Dashboard:** Built a self-serve dashboard for API consumers that turns OpenAPI specs into human-friendly docs, sample requests, and quickstarts; experimented with LLM-based assistants to answer integration questions and analyze failed calls.

Education

RSR Rungta College of Engineering and Technology

2011 – 2015

Bachelor of Engineering in Information Technology

Key Achievements & Awards

- **Most Dependable Award (DBS 2023-Present):** Recognized for reliability, knowledge sharing, and team support.
- **Altimetrik Gem Award (2018-2019):** Established core DBS team in Hyderabad with timely deliveries.
- Led React framework adoption across 5+ domains enabling seamless hybrid UI development at DBS.
- Achieved 99.9% crash-free rate for production applications serving millions of users.
- Spearheaded Swift/SwiftUI modernization and Xcode migrations reducing technical debt by 20%.
