Professional Summary

Senior iOS Engineer with 10+ years building high-quality consumer and banking apps used by millions of users, with deep experience in Swift, SwiftUI, UIKit, and modern iOS architectures. Led UI/UX development and design system work for large-scale mobile apps, collaborating daily with product designers and product owners from wire-frames and prototypes through implementation, polish, and release. Strong focus on interaction design, visual consistency, and performance, including reusable component libraries, pixel-perfect layouts, and fast iteration based on user and stakeholder feedback. Comfortable in fast-paced, cross-functional teams, taking ownership of features end-to-end and working closely with backend engineers to define API contracts and ship reliable experiences.

Technical Skills

iOS UI/UX & Frontend: Swift, SwiftUI, UIKit, React JS, React Native, JavaScript, Design Systems, Component Libraries

Design & UX: Reusable Design systems, component libraries, pixel-perfect UI implementation, animation and interaction design, accessibility, working from Figma/Sketch wireframes and mockups.

Mobile Architecture: MVVM, VIPER, Clean architecture, modularization, reusable UI frameworks, SOLID Principles.

Backend & APIs: RESTful APIs, JSON, Java/Spring Boot – focused on API contracts, request/response models, debugging integration issues.)

CI/CD & DevOps: Xcode, TestFlight, Fastlane, Jenkins, Bitrise, GitHub Actions, Travis CI, CocoaPods, Carthage, xcframeworks, Git.

Testing: XCTest, XCUITest, Earl Grey, Unit Testing, UI Automation, Code Coverage Reports

Leadership & Collaboration: Squad leadership, mentoring, code reviews, cross-team alignment, stakeholder communication.

SDLC: Change Request (CR) Process, Impact Assessment, Agile/Scrum

Professional Experience

DBS Bank

June 2023 – Present

Senior Software Engineer – UI/UX Lead (Mobile & React)

Singapore

- Led UI/UX development for the DBS mobile app using React and native iOS, delivering pixel-perfect interfaces for millions of users across 15+ banking features in close collaboration with product designers and product owners.
- Architected a React integration framework and reusable component library and partnered with design to define design tokens, layout rules, and interaction patterns, significantly reducing development time and ensuring visual consistency across 5+ domains.
- Worked end-to-end from wireframes and Figma/Sketch mockups to implementation and release, helping refine UX flows and micro-interactions based on stakeholder feedback and usability findings.
- Built a comprehensive design system with reusable UI components in Swift and React, ensuring accessibility compliance and consistent user experience across new mobile initiatives.
- Optimized UI performance using Xcode Instruments (Time Profiler, Allocations, Leaks), reducing app launch time significantly and memory consumption by 30% for key customer journeys.
- Led Xcode 14–16 migration initiatives, resolving unit test compatibility issues and keeping Swift, Objective-C, and React modules stable across toolchain upgrades.
- Collaborated with backend teams on Java/Spring Boot banking microservices, refining REST contracts, debugging integration issues, and contributing small backend enhancements (new API endpoints, request/response DTOs, validation, and minor business logic changes) to support new mobile and React UI flows.
- Established CI/CD pipelines using Jenkins, AWS, GitHub Actions, and Fastlane, automating builds, tests, code coverage reports, and zero-downtime deployments.
- Mentored a team of 5 developers on React and SwiftUI best practices, code reviews, and design system adoption, improving team velocity by 35%.
- Implemented security measures including SSL pinning, biometric authentication flows (TouchID/FaceID), and secure session management for banking compliance, laying groundwork for AI-driven anomaly detection on session data.
- Managed complete SDLC including Change Request (CR) process with impact assessment, testing strategy, UAT coordination, and stakeholder communication across multiple squads.

foodpanda

March 2020 – May 2023

Senior Software Engineer – iOS Development

Singapore

- Led iOS UI/UX development for a consumer food delivery app serving 5M+ users across APAC, focusing on highly polished marketing campaigns, offers, and real-time order tracking experiences.
- Designed a modular MVVM architecture using Combine, creating reusable UI components that enabled parallel feature development across an 8-member team while maintaining visual and interaction consistency.
- Developed real-time order tracking flows using WebSockets and MapKit, optimising animations, scrolling, and map interactions and improving delivery accuracy and customer satisfaction.
- Prototyped an fraud and abuse monitoring view on top of tracking and promo usage data, helping operations teams quickly identify suspicious patterns in orders and rider behaviour.
- Built and maintained iOS CI/CD pipelines on Bitrise and Travis CI, automating builds, tests, and releases and monitoring build health for frequent production deployments.
- Created a reusable UI component library (Swift + Objective-C via Carthage and xcframeworks) for seamless integration across multiple product domains.
- Achieved 85% code coverage using XCTest and UI automation frameworks, reducing production bugs by 60% and supporting fast, confident iteration on UI features.

DBS Bank (via Altimetrik)

August 2018 – January 2020

Senior Software Engineer – iOS Development

Hyderabad, India

- Played a vital role in digital transformation from a Kony hybrid framework to native iOS, migrating the codebase to Objective-C and Swift and developing UI modules for fund transfers, bill payments, and account management used by 3M+ customers.
- Implemented biometric authentication UI flows and secure session management using Keychain and TouchID/FaceID, forming the basis for later mobile security enhancements.
- Collaborated with security teams to design a reusable mobile security framework prototype (jailbreak detection, device integrity checks, API misuse safeguards) for banking apps.
- Managed Jenkins CI/CD pipelines for automated builds, monitoring pipeline health and ensuring quality gates.
- Created a reusable UI component library ensuring a consistent banking experience across millions of customer touchpoints.
- Conducted technical interviews and worked with leadership to build and scale the new DBS iOS mobile team in Hyderabad, helping establish the core engineering group and hiring multiple senior and mid-level iOS developers.

AgreeYa Mobility (Quest Global)

December 2017 – July 2018

Senior Software Engineer

Pune, India

- Developed an iOS framework for Apple CarPlay integration with custom UI for vehicle head unit communication.
- Built product from scratch with Bluetooth connectivity and Siri integration, and converted C++ libraries to Swift/Objective-C compatible frameworks.
- Explored basic anomaly detection on vehicle/connection logs to improve stability and inform future AI-powered diagnostics.

Webdunia India Pvt Ltd

July 2015 – December 2017

iPhone Developer

Indore, India

- Built news and media iOS applications with focus on content streaming, offline reading, and push notifications, re-writing older Objective-C applications to Swift.
- Implemented multimedia playback UI using AVFoundation and optimized image loading, reducing bandwidth by 35% on low-connectivity networks.
- Managed the full SDLC for multiple apps, including client communication, UX discussions, requirement gathering, implementation, App Store publishing, and post-launch iterations.

AI & Research-Oriented Projects

- **Fraud Call Detection MVP:** Designed a proof-of-concept fraud call detection flow for a mobile banking context by combining call metadata, behavioral signals, and AI-assisted heuristics, with dashboards to inspect flagged interactions and tune thresholds.
- **Mobile Security Framework for Banking Apps:** Architected a reusable mobile security framework (device integrity, jailbreak/root checks, secure networking patterns) and used AI tools to generate threat models, test cases, and refactoring suggestions.

Education

RSR Rungta College of Engineering and Technology

Bachelor of Engineering in Information Technology

2011 – 2015

Key Achievements & Awards

- **Most Dependable Award (DBS 2023-Present):** Recognized for reliability, knowledge sharing, and team support.
- **Altimetrik Gem Award (2018-2019):** Established core DBS team in Hyderabad with timely deliveries.
- Led React framework adoption across 5+ domains enabling seamless hybrid UI development at DBS.
- Achieved 99.9% crash-free rate for production applications serving millions of users.
- Spearheaded Swift/SwiftUI modernization and Xcode migrations reducing technical debt by 20%.
